

Land Transport Management Policy

Land Transport is the vital means of transport supporting PTTEP's business throughout the value chain. We aim to achieve operational excellence in terms of SSHE and efficient management system in alignment with company strategy and PTT Group.

PTTEP shall:

- Comply with all applicable land transport laws and regulations, and adhere to appropriate industrial standards and practices in all our global operations.
- Manage land transport activities that safely, efficiently and effectively transport hydrocarbon, non-hydrocarbon and people in PTTEP's operations.
- Control and mitigate land transport risks to levels that are as low as reasonably practical (ALARP) and prevent recurrence of incidents through efficient risk management and incident management.
- Efficiently and effectively implement management system and technology so as to ensure robust processes and continuous improvement in land transport performance.
- Reinforce to employees and contractors the driver's Fitness To Work (FTW), regulations on working hours, driving hours and rest periods. All drivers shall only operate a vehicle when fully alert and fit-to-drive.
- Control and minimize environmental impacts of land transport activities through energy efficiency improvement, reduction of greenhouse gas emissions and spill prevention.

All managements shall promote and support this policy, and are accountable for the policy alignment. Employees and contractors at all levels shall comply with this policy throughout their activities.

Mr. Phongsthorn Thavisin
President and Chief Executive Officer
